

# Contract and Grant Activity Fiscal Year 2010

## Annual Summary Report

<http://or.ucr.edu/spa/reports.aspx>

## Overview

This Annual Report provides information on contract and grant activity for the University of California, Riverside (UCR) for the 2010 fiscal year (July 1, 2009 to June 30, 2010), and trend and historical data from prior fiscal years. It includes the number and monetary amount of proposals submitted, and awards received on behalf of UCR.

Awards are accounted for in the corresponding fiscal year that the award is executed, the execution date being the date that the terms and monetary amount of the award were agreed upon between the sponsor and UCR. Proposals are amounts requested from a sponsor to support research at UCR. Proposals are accounted for in the fiscal year corresponding to the submission date of the proposal to the sponsor.

The total funding awarded to sponsored projects at UCR in 2009-10 was a record \$115 million. This is an increase of 27% over last year's total of \$90 million, and represents a more than doubling of sponsored funding over the last ten years. This dramatic increase in sponsored funding is mostly due to increased funding from the federal research agencies. We received \$78 million in federal funding in 2009-10, of which \$23 million came from the National Science Foundation and \$19 million from the National Institutes of Health.

These record funding levels can be linked directly to the effect of the American Recovery and Reinvestment Act (ARRA), from which we received 56 awards totaling \$13 million. These ARRA funds were awarded through extremely competitive programs run by federal research agencies. In fact, \$9 million of the ARRA funds awarded to UCR came from just two agencies, the National Science Foundation and the National Institutes of Health.

It is also important to note how well our assistant professors are competing for federal funding early in their academic career. In the year 2009-10, assistant professors in science and engineering received three Faculty Early Career Development awards from the National Science Foundation. The Foundation describes these awards as the "most prestigious awards in support of the early career-development activities of those teacher-scholars who most effectively integrate research and education." We are still attracting the best and brightest to come build their career at UC Riverside. This is a wonderful indicator that the quality of UCR research will continue to be very high for the foreseeable future.

Although this surge in research funding gives an enormous boost to research programs at UCR, it has represented a large increase in the workload for all the people who administer research activity on campus. Not only are there more proposals to submit and more budgets to keep track of, but we are required to track all the ARRA funds at a level of detail that is unprecedented. I am indebted to the people in departments, research centers and institutes, and the central offices that oversee research administration for their heroic efforts.

Charles F. Louis  
Vice Chancellor for Research
